

5 Cities+ 2025 Conference

“Leading Through Uncertain Times”

August 25-27, 2025
Louisville Ky, OMNI Hotel

Clean Water Utilities provide critical public health, safety and environmental protection services that ensure sustained resiliency and vitality of the communities they serve. These services must continue despite current feelings of unease, untrust and uncertainty being experienced across every facet of our country. But clean water utilities are resilient, pivoting when necessary to apply innovative solutions to today’s challenges.

The 5 Cities+ Partnership was created over 20 years ago to share operational challenges, lessons learned and innovative solutions among the member clean water utilities. Although the actual utility services delivered by the members vary, the member utilities experience similar uncertainties impacting daily operations and management efforts.

Continuing with tradition and building on our legacy, the conference will bring utilities and their partners together for robust discussions related to solving “Utility of Today” challenges.

We look forward to seeing you in Louisville
August 25-27!
