Fully Featured Wide Format MFP Solution with No Compromises

PrintWizard converts every WideTEK© scanner to a powerful MFP system by adding the printer of your choice. The PrintWizard is an extension to the ScanWizard and adds print and copy functionality to it. PrintWizard maintains full control of all features of the attached printer, even paper properties or the level of available ink are visible without having to physically access the printer.

Templates

ScanWizard and PrintWizard each have five predefined scanner and printer templates which help the less experienced user to pick the right settings. The settings defined by the templates as well as their names can be changed and new templates can be added to suit other applications.

Copy Button

The copy button is also freely configurable and allows a single button copy function, using any one of the templates. This makes copying a set of large documents a simple task for everyone.

ScanWizard

ScanWizard is the control center of the scanner and runs on the built in 64bit Linux PC, making an external PC obsolete. It is operated through the 22" external touch screen but can also be accessed by any web browser via the scanner´s IP address. ScanWizard functionality includes:

•Automatic document width and position detection
•Crop and deskew operation even on long documents
•Virtual rescan to change scanning parameters on the fly without physically scanning again.
